

U.S.Vermax

Composted and pasteurized poultry manure. An excellent source of slow-release organic nitrogen, as well as phosphorus, potassium, and calcium. Rich in organic matter. Because its nitrogen is organic, U.S.Vermax releases its nitrogen over a long period, steadily feeding plants. This also means it has a very low potential to burn plants through overnitritication, or to pollute runoff.

About U.S. Vermax:

- U.S. VerMax is a general-purpose granular organic fertilizer.
- It's an excellent source of organic matter, carbon, and NPK nutrients.
- U.S. Vermax is easily broken down, so it's readily absorbed by plants. It also stimulates soil microbes, improving soil health.
- An excellent general-purpose organic fertilizer.
- Has a low burn potential.

Application Rates

Initial Application: Apply up to 1,750 pounds of U.S. Vermax per acre. (40 Pounds applied per 1,000 ft².)

Established Application: Apply up to 875 pounds of U.S. Vermax per acre. (20 pounds applied per 1,000 ft².)

House Plants: 4" pot: 1 oz of U.S. Vermax, 6" pot: 1.5 oz of U.S. Vermax, 8" pot: 2 oz of U.S. Vermax, 12" pot: 3 oz of U.S. Vermax and water after application.

Cool Season Grass: Apply 2lb/100 ft² of U.S. Vermax in the early spring. Reapply in the late fall.

Warm Season Grass: Apply 3 lb./100 ft² of U.S. Vermax in the early-mid spring. Reapply 2 lb./100 ft² in late summer.

Garden: Apply 3-5 lb. of U.S. Vermax prior to planting. Water after U.S. Vermax has been applied. Reapply in one month or as needed.

Flower Bed: Apply and plant after last frost in spring. Apply up to 1 lb./10 ft² of U.S. Vermax to flower bed and water after application. Reapply as needed.

Trees: Apply 2 lb./inch of trunk diameter of U.S. Vermax in early spring and reapply in late fall under the canopy of the tree.

Guaranteed Analysis:
