

U.S.YUCCA

Liquid U.S.Yucca is an excellent source of natural plant sugars, as well as plant saponins. The saponins in Liquid Yucca Extract reduce surface tension in soil, which allows water to penetrate soil faster and easier. Ideal for dry soils and hard-to-wet soils, such as clay soils.

U.S.YUCCA

Organic Liquid Soil Amendment

About U.S.Yucca:

- Liquid U.S.Yucca is produced from a desert plant.
- Contains natural surfactants which reduce surface tension, allowing water to more easily penetrate the soil and adhere to soil particles, which increases the soil's waterholding capacity.
- Contains plant sugars which provide usable energy to plants and microbes.
- Liquid U.S.Yucca can be applied to flowers, fruit, vegetables, ornamentals, turf, tree and vine crops, field crops, row crops, trees, etc.

Mixing Instructions:

When mixing with water, fill container halfway, then add product and the remaining water.

Gallon Mix: While agitating the solution add 3 fluid ounces of U.S.YUCCA to 1 gallon of water.

Tank Mix: While agitating the solution, add 1 gallon of U.S.YUCCA to 50 gallons of water.

Directions For Use: Shake well before use. Do not store diluted.

Shelf life is 2 years from date of purchase.

Application Rates

Apply 50 gallons of U.S.YUCCA mixture per acre. (40 ounces per 1,000 ft²)

Agricultural: Use the Liquid U.S.Yucca tank mix instructions and apply before planting season and throughout the growing season as needed.

Germinating Seeds: Use the Liquid U.S.Yucca gallon mix instructions, and apply after you have your seeds sown. If seeds need to be soaked, use the Liquid U.S.Yucca mixture.

Turf/Lawn: Use the Liquid U.S.Yucca tank mix instructions and apply monthly during growing season and again in late fall.

Nursery/Greenhouse: Use the Liquid U.S.Yucca gallon mix instructions and apply as if regularly watering up to four times a year.

Hydroponic Gardens: Use the Liquid U.S.Yucca gallon mix instructions and apply after plants are established monthly.
