

## VISION

To become the top brand of eco-friendly and high-quality rice in Vietnam by 2030

To constantly build and expand the planting areas of clean rice by investing in science and technology, refining a chain of production for supply of clean and safe rice.

To successfully bring clean agricultural products of Vietnam to world-wide market.

## MISSION

TITASA cooperates with governmental agencies and farmers to develop and improve the value of organic agricultural products, bringing the best benefits to consumers and the agricultural community.

Responding to national policies, and training farmers at the same time to raise awareness of the issue of environmental protection in agriculture work.

Company profile

## INTRODUCTION

Organic TITASA USA Co., Ltd. is a multi-disciplinary company working in the Agriculture field. We have a diversified business model which includes production, processing, integrating planting areas, importing, and promoting trade services within the agriculture sector. TITASA has developed clean and organic agriculture within the Vietnamese rice value chain.

TITASA plays a direct role in the fertilizer component of Organic farming by actively importing Organic fertilizers from US manufactures. We are also investing in domestic Vietnamese product that will increase the availability of organic fertilizer that meetings the world's highest standards and technologies found in the microbiological fertilizer industry. Our facility is strategically located in the cottage industrial zone of Nga Bay Town in Hau Giang Province.

Our goal is to create a common prosperity and trust between TITASA and our many major domestic and foreign partners. Our proposals have been received positively in the spirit of companionship. And the response from local organizations has been enthusiastic and has helped us progress sustainably.
